

Sight Sciences to Report Fourth Quarter and Full Year 2025 Financial Results on March 4, 2026

February 18, 2026

MENLO PARK, Calif., Feb. 18, 2026 (GLOBE NEWSWIRE) -- Sight Sciences, Inc. (Nasdaq: SGHT) (Sight Sciences or the Company), an eyecare technology company focused on developing and commercializing innovative, interventional technologies intended to transform care and improve patients' lives, today announced it will report financial results for the fourth quarter and full year ended December 31, 2025, after the market close on Wednesday, March 4, 2026. The Company's management will discuss the results during a conference call beginning at 1:30 p.m. Pacific Time / 4:30 p.m. Eastern Time.

Investors interested in listening to the conference call may do so by accessing a live and archived webcast of the event at www.sightsciences.com, on the Investors page in the News & Events section. The webcast will be available for replay for at least 90 days after the event.

About Sight Sciences

Sight Sciences is an eyecare technology company focused on developing and commercializing innovative and interventional solutions intended to transform care and improve patients' lives. Using minimally invasive or non-invasive approaches to target the underlying causes of the world's most prevalent eye diseases, Sight Sciences seeks to create more effective treatment paradigms that enhance patient care and supplant conventional outdated approaches. The Company's [OMNI[®] Surgical System](#) and [OMNI[®] Edge Surgical System](#) are implant-free, minimally invasive glaucoma surgery technologies indicated in the United States to reduce intraocular pressure in adult patients with primary open-angle glaucoma. The OMNI Surgical System is CE Marked for the catheterization and transluminal viscodilation of Schlemm's canal and cutting of the trabecular meshwork to reduce intraocular pressure in adult patients with open-angle glaucoma. Glaucoma is the world's leading cause of irreversible blindness. The [SION[®] Surgical System](#) is a bladeless, manually operated device used in ophthalmic surgical procedures to excise trabecular meshwork. The Company's [TearCare[®] System](#) is 510(k) cleared in the United States for the application of localized heat therapy in adult patients with evaporative dry eye disease due to meibomian gland disease (MGD), enabling clearance of gland obstructions by physicians to address the leading cause of dry eye disease. Visit www.sightsciences.com for more information.
